Class Of

It's not the days in your life you'll remember, it's the memories. Remember the friends, and the good times you spent with them as well as the bad times. Remember the hard work and experiences. Remember who Wachusett Regional High School has made you to be. We are all parting our ways but always remember what we all have in common. Everyone in this book bleeds green and white. Don't forget these memories as you travel to all the places you may go.

"You're off to great places, today is your day, your mountain is waiting so get on your way."
Remember your friends, your laughs and your cries. Remember Wachusett through all these goodbyes.
The memories we made here may bring you a tear but during the grad parties we can all have a cheer. Wachusett has taught you to reach for your goals so always remember bleed green is in your soul.
Look back on these years with nothing but smiles, as you go on your way and travel for miles.
From sports games to musical plays we all had our own way we weren't all the same, but that is okay.
These four years felt so long but really flew by, so don't regret any of it, don't pout, don't sigh. Don't forget the teachers who put up with us, although they gave us homework to help which made us just fuss.
Remember the cheering in the bleachers, the badlands with our fans, the buses we rode in and the unforgettable wins. We also had homecoming, winter carnival and prom these dances were crazy, and fun but never calm.
Wachusett has taught you to learn who you are and now we are ready to travel so far. We will never forget the friends that we made, we will never forget this school and our grade. As Dr. Seuss would say we are on our way, to learn and to grow, "as you travel to all the places you will go."

MEGA MELTDOWN

According to scientists at NASA and the University of California-Irvine, the melt rate of glaciers in West Antarctica tripled over the last 10 years. The amount of water lost every 2 years equals the size of Mount Everest, or 91.5 billion tons per year. The massive melt means sea levels will rise in the upcoming decades and centuries.

STONEHENGE DISCOVERY

Using radar, laser scanners and magnetometers, scientists discovered an additional 17 chapels and other archaeological features near Stonehenge, disproving the assumption that Stonehenge was built as an isolated structure. EARHART MYSTERY SOLVED?

An aluminum patch may lead to answers about the mysterious disappearance of famed female aviator Amelia Earhart. According to The International Group for Historic Aircraft Recovery (TIGHAR), the recovered debris is a patch that was only used on the type of plane Earhart was flying. The patch is thought to be a part of wreckage detected by sonar off the remote South Pacific island of Nikumaroro, suggesting Earhart did not die in a plane crash, but instead became an island castaway.

Students at Australia's University of Adelaide created a simple and efficient water treatment system using chip bags, plywood and glass tubing. The Center for Disease Control and Prevention estimates 780 million people worldwide do not have access to clean water.

5-SECOND RULE: A MYTH?

The 5-second rule, which claims that food dropped on the floor and picked up in less than 5 seconds is safe to eat, is not actually true. It takes less than 5 seconds for harmful bacteria to latch onto your tasty morsel. So, the next time someone calls "5-second rule!," think before you eat.

The California Blue Whale bounced back from near extinction, with 97% of its historic population restored, making it the only whale population known to rebound from the effects of whaling. Measuring 100 ft. long and weighing 200 tons, the blue whale became protected in 1966.

MONSTER OF THE DEEP

Thanks to a remotely operated submarine's recorded video footage, scientists were able to get a good look at the Black Seadevil anglerfish in its natural environment. Because these creatures live in the deep sea (1,900 ft. below sea level), it has been difficult to study live anglerfish until now. The female anglerfish is best known for a glowing bump on its head that attracts prey.

RARE BLUE LOBSTER FOUND

A Maine lobsterman and his 14-year-old daughter discovered something unusual in their traps: a bright blue lobster. They named the crustacean Skyler and donated it to the Maine State Aquarium. Lobsters are commonly brownish green in color; a blue lobster is thought to be even more rare than 1 in a million—it is 1 in 2 million!

BLAST FROM THE PAST

A 113-year-old time capsule was discovered in Boston sealed inside a lion statue, perched on top of the Old Massachusetts State House. Coppersmith Samuel Rogers originally placed the capsule inside the statue in 1901, and it remained hidden until a Rogers descendent tipped-off the Bostonian Society. The capsule contained photographs, news clippings, campaign buttons and political memorabilia.

COCOA BOOSTS MEMORY

Results from a scientific study showed that cocoa's flavanols helped to improve memory by boosting neural connections and function. But don't start chowing down on Hershey® bars just yet—flavanols are found in raw, unprocessed cocoa and the study's participants drank a specially made high-flavanol cocoa drink to gain improved memory.

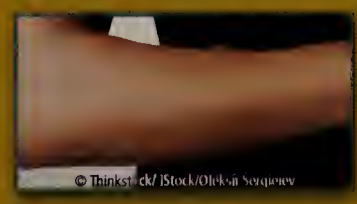
MEGA CREEPY

Two discoveries of mega spiders will make your creepiest fears come true: A "fishing spider" in Wisconsin can grow up to 3 inches in size, and aggressively hunts down fish and other creatures underwater. In Baltimore, Maryland, 107 million orb-weaver spiders infested a water treatment plant and spun a 4-acre web inside that was large enough to pull 8-ft. lights out of place.

WILD WONDERS

WHY DO SPIDERS HAVE HAIR?

Spiders have hair on their feet, allowing them to walk up smooth, vertical surfaces. The end of each spider leg is covered with thick brushes of hair. Each individual hair is covered in tiny "feet" that grip whatever surface the spider is navigating.



WHAT ARE GOOSE BUMPS?

They are a reflex, which is something your body does without you even thinking about it. If you become cold or scared, your muscles tense and cause little bumps on your skin to rise up. They are called goose bumps because your skin looks like a goose's skin after its feathers have been plucked.

WHY IS THE MOON OUT DURING THE DAY?

The moon orbits the Earth, so it is visible both during the day and night. We can see the moon during the day depending on the Earth's rotation, the sun reflecting off the moon's surface and if the moon is above the horizon.

SPIDERMAN REALITY

Stanford University's new creation can make any person's dreams of becoming Spider-man™ come true. The "Gecko gloves" contain adhesives that allow a 154-lb. man to scale a vertical glass wall. The Chairless Chair® is a chair you can wear. When you don't need it, you can move freely while wearing it, and even run. Yet, it can be ready for use with the push of a button. FB LOVE CONNECTION

Facebook® tested a new "Ask" button that is linked to the relationship status portion of a user profile. FROZEN FRENZY

For the 1st time in 11 years, Barbie™ was not the top toy on girls' wish lists. Instead, Disney's® *Frozen* apparel and merchandise took the nation by storm and there was plenty to choose from: everything from pajamas to dishes, slippers, backpacks, bedding and more. Other popular toys for girls included Monster High™ dolls and My Little Pony®, while boys preferred LEGO®, Teenage Mutant Ninja Turtles™ and Hot Wheels®. Both boys and girls requested tech-savvy gifts such as Apple iPads and other tablets, video games, XBox™ One and PlayStation® 4.

GUYS JOIN IN

Fashion for guys expanded and offered more opportunities for expressing personality with style. Top fashion picks for young men included blazers, leather jackets, Doc Martens, and buttoned-up shirts for a "rebellious prep" look.

FANCY FOOTWORK

Slip-on shoes in a variety of prints and styles were huge with both boys and girls. The Western-themed trend, metallics, and plaid also transferred to footwear choices.
